DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, there is no support for the “first differential amplifier” and the “second differential amplifier” each providing a respective “differential signal” which is provided to the “driver”. As expressly disclosed in the specification and seen in the drawings, the differential amplifiers each provide a single ended output signal (i.e., not “differential” or complementary) to the “driver”.

Claims 2-6 are rejected as including the indefiniteness discussed above with claim 1.

Claims 7-9 are rejected for similar reasons as claims 1-6.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Park (USPN 6,265,858). Park discloses, in Fig. 6, a circuit comprising: “a reference voltage divider (20) for generating first (Vref1) and second (Vref2) reference voltages”; “a first differential amplifier (DA2) for receiving the first reference voltage”; “a second differential amplifier (DA1) for receiving the second reference voltage”; and “a driver (22) being driven by the first and second differential signals”, all connected and operating similarly as recited by Applicant..
